Subject: ripped of by the monopoly

How could Microsoft be anything but a monopoly when they take almost \$500. for their office product and continue to squash competitors by incorporating features initiated by others, thanks to their platform monopoly.

Why not stand up to monopolistic enterprises.

Just because DoJ is busy with other important issues, please don't look the other way and cave in to MS.

MS can only thank the disaster of 9/11 if you let them off easy!

Please do your job beyond minimum expectations.

your taxpayer,
art schroepfer
